

Power Platform Consultant

This role's focus will be to:

- Transform business requirements into working solutions built on the Microsoft Power Platform (PP) and related Microsoft products
- Develop and test automated solutions based on design documentation
- Participate in the design phase of the project process by fully documenting all meeting notes in any requirements gathering discussions
- Create appropriate project documentation based upon requirements gathering meetings
- Identify and troubleshoot issues with UI, UX, and data mappings
- Work with a highly dynamic team focused towards successfully supporting our client's Digital Transformations
- Understand the business domain and related processes to implement successful solutions using PP
- Manage customer deliverables and regularly report the status of those deliverables via daily internal reviews and weekly external reviews
- Properly document both functional and technical solution details for users and admins
- Train end users and admins on the deployed solution(s)

Required skills and experience

- Experience working in an IT-related field, and extensive knowledge of at least one of the Microsoft Power Platform family of products
- Understanding of relational databases preferably Microsoft SQL Server and/or Common Data Service
- Ability to work in a dynamic environment with changing requirements and rapidly shift responsibilities
- Good communication and presentation skills in order to successfully fulfill client facing-role with exposure to senior client resources

Desired skills and experience

- Bachelor's Degree in computer science, business, or related field
- Master's Degree in computer science, business, or related field
- Process/workflow designing experience using MS Visio
- Basic knowledge of JSON and REST architecture
- Experience in C#
- Understanding of PowerShell Scripts
- Experience working with Common Data Service or Power Apps Portals (ADX Studio)
- Experience working with Microsoft Dynamics CRM (CE, FS, PS, CS, etc.)
- Ability to offer valuable leadership participation in the solution design phase of the project process

Additional abilities

- Demonstrated knowledge or skills interfacing with end users and vendors.
- General knowledge or skills in project coordination and project management.
- Ability to work independently at home office or equivalent workspace and reliable high-speed internet connection
- Attention to detail and accuracy.
- Effective time management and organizational skills
